MiTek
MiTek®

From the Managing Director - Paul Spicer

I would like to introduce both myself and our expanding business . I was born in Bundaberg and have many years experience in sawmilling and the building supply industry. We service areas as far as Rockhampton/Emerald to Brisbane and as far west as Toowoomba. Our business is geared to supply quality products and support to the building trade.

CQ Building Supplies has been operating since 2002, have survived major competition, economic downturns, storms & floods. We support community organisations, maintained our reputation for service & customer satisfaction.

CQ is a member of Natbuild, Australia's Largest Trade Supply Buying Group, giving us the benefit of being independent but still able to get the buying power of a large group.

Natbuild is a group of 36 long term trade independent organisations operating from over 174 metro & regional locations. Natbuild is Australia's leading trade timber, hardware & building supplies buying group .

Bi-Rite Home Appliances Group, have 90 stores, providing access to Australia's most popular electrical products.

With this relationship we can offer some great wholesale packages for builders.

As a group we are the only manufacturer in Australia who can design using Pryda Build software or Mitek software.

We can utilise the advantages of both to achieve more cost effective designs. Pryda Build provides interactive 3D models, intuitive layout modules & powerful truss design tools, allowing features, such as wall bracing design, roof load areas, critical load paths & component design.

MiTek SAPPHIRE™ is the next generation of prefabrication software. MiTek SAPPHIRE™ is a whole house software suite that has, at its core, a complete 3D digital computer model...enabling the design of an entire house or commercial structure as a single entity.

We have a common value of One Team! Working together with a vision "to make a positive difference to you".

Best wishes—*Paul Spicer*

What we offer

Frame and Truss Fabrication - We design and manufacture trusses and frames to your plans. We assist in developing design solutions to minimise cost in material and installation. It's the total cost that counts not just the material cost.

Timber, hardwood and softwood - There is a great selection in stock. We can cut to length, size and dress.

Engineered wood products - Glulam, LVL & I-beams can be quoted & supplied to order.

Sheeting and cladding - a variety of James Hardie structural, decorative, exterior & interior wall applications.

Plasterboard and metal systems - we have Knauf distributorship. If required technical advice can be provided including highrise commercial solutions.

Hardware, fasteners & sealants - Builders hardware fasteners & fixings, silicone & sealants for all your project needs.

Mouldings - from architrave to beading hardwood & pine for the local needs.

Doors - we stock a range of Hume doors or you can order to your specification, door & window furniture is also available.

Flooring & decking - both local & imported hardwood products.

Treated timber H2, H3 & H4, fencing &

Landscaping - sleepers to palings we've got it covered.

Posts, steps, fascia & sills - supplies for new or renovation jobs.

White goods - we can supply at commercial prices most appliance brands for cooking and laundry. Brands such as Smeg, Westinghouse, Electrolux, LG, Beko and much more.

What makes us different

Supplying Queensland with quality building products
